## PROFILE

I am a passionate junior full-stack web developer with experience in the MERN stack, transitioning from IT support. Enthusiastic about creating innovative solutions and constantly learning new technologies. Committed to delivering high-quality, user-friendly websites.

## PROJECTS

### • Weather App

An interactive weather application that displays real-time weather updates using HTML, CSS, JavaScript, and the Open Weather Map API.

### • Todo App

A simple and efficient to-do list application built with HTML, CSS, and JavaScript to help you manage your tasks.

### • DoctorDesk

A comprehensive doctor-patient management application built with the MERN stack (MongoDB, Express.js, React, and Node.js) to streamline healthcare administration.

### • GymBoard

Developed an online gym class booking app using the MERN stack (MongoDB, Express, React, Node.js).

### • Beababy.gr

A charming and user-friendly eCommerce website for baby products built with WordPress and WooCommerce, offering a delightful shopping experience for parents.

## EXPERIENCE

2012 - 2023

IT Support/IT Technician

**KOMNINOS P. AND CO LP**

- Desktop and laptop repairs.
- Network and cable installation.
- Cash register machines.
